pure02_irregular4; beta=2: held-out extrapolation and subsequent refits
New larger-L points never enter the frozen baseline fit. Sensitivity ranges are not statistical errors.
Frozen original fit: L <= 144
Raw equilibrium data
log_inv1: fit
log_inv1: extrapolate
log_inv1_inv2: fit
log_inv1_inv2: extrapolate
D
ln L
Out-of-sample error; bars: Lmin range
Observed D - predicted D
Held-out L
log_inv1, Lmin=24
log_inv1_inv2, Lmin=24
Refit sensitivity after adding data
Finite-window c
