Massless honeycomb reference: two valleys, one species; not Born entropy samples
(a) Ground-state number-fluctuation corner
p = 1/3 (FFT)
p = 1/3 (finite-window fit)
p = 1/2 (FFT)
p = 1/2 (finite-window fit)
$D_{V,0}$
$\ln L$
(b) Local slopes, without fitting
p = 1/3
p = 1/2
Known Dirac value: 0.06597528
$\Delta D_{V,0}/\Delta \ln L$
$\sqrt{L_i L_{i+1}}$ (log scale)
