near02_irregular3; final
Bands: model/window ranges, not confidence intervals; filled/open time squares: local pass/unresolved
Both finite-window estimates
Eq L=18..144; time L=180, theta=4..7
Fitted coefficient c
Measurement strength β
Equilibrium
Nonequilibrium: local checks
Nonequilibrium: unresolved diagnostic
Equilibrium L=18..144
Size/model range; independent y scale
Equilibrium c
β
