uniform_A dense beta: final; Available: eq 21/21, time 21/21
Time: L=180 vs 144, theta=4..7, log_inv1_inv2; shaded available-fit ranges are not confidence intervals
Explicit primary estimates; linear axes
Single-species fitted coefficient c
Measurement strength β
Equilibrium
Nonequilibrium: local checks
Nonequilibrium: unresolved diagnostic
Eq. model/window range
Time model/window range
Small signals remain visible
Coefficient ratio
Measurement strength β
Nonequilibrium / equilibrium
Equilibrium reference
Comparison only; never a selection target
(Time c - equilibrium c) / |equilibrium c| (%)
Measurement strength β
