
Production sampling checks | gray = not in the frozen grid
Max rank/folded Rhat (SA,D)
Rhat; screening threshold 1.01
Min bulk/tail ESS (SA,D)
ESS; screening threshold 400
Direction contrast
mean(SA-SC) / estimated MCSE
D absolute precision
Estimated MCSE / target 0.003
SA absolute precision
Estimated MCSE / target 0.01
D disjoint-half drift
Absolute half-mean difference / 0.003; not a z score
L
β
All prescribed retained samples are shown. Direction/half-drift panels are diagnostics; no forced symmetry or independent-half z test.
Rhat/ESS and estimated MCSE cannot exclude a tail missed by all chains; no finite-size scaling claim is made by these panels.
