beta=1.5, mu=1e-8 | finite-window diagnostics only
Finite-window models, L=6–24
log + 1/L, chi2/dof=0.97
log only, chi2/dof=7.8
original local MC
Born mean D
Data minus fit
log + 1/L
log only
ln L
Finite-window models, L=6–24
area + constant, chi2/dof=46
area + log + constant, chi2/dof=2.7
original local MC
Born mean SA
Data minus fit
area + constant
area + log + constant
L
No beta-zero MCSE. Positive-beta error bars exclude model/size-window error; fits and Lmin=9 checks are retained in tables.
