beta=2.5, mu=1e-8 | finite-window diagnostics only
Finite-window models, L=6–24
log + 1/L, chi2/dof=1.8
log only, chi2/dof=3.2e+02
original local MC
Born mean D
Finite-window models, L=6–24
area + constant, chi2/dof=5.4e+02
area + log + constant, chi2/dof=23
original local MC
Born mean SA
log + 1/L
log only
Data minus fit
ln L
area + constant
area + log + constant
Data minus fit
L
No beta-zero MCSE. Positive-beta error bars exclude model/size-window error; fits and Lmin=9 checks are retained in tables.
